

# Why Advanced Micro IT Services

Not all IT providers are created equal. Here are a few things that separates Advanced Micro from the rest:

- Serving small to Mid businesses on East Coast since 1989. Our target client has between 1-100 users.
- Offer a dedicated team to service your account: Account Manager, Primary Technician, and Secondary Technician.
- Hold many large corporations credentials such as: Microsoft, Dell, eMDs, HP, Okidata, Cisco, Sonicwall, etc. than many other local providers.
- We take security, and backups seriously. All of our technicians have passed background security checks.
- No long-term contracts are required.

## Service Plan

Our all-inclusive managed service plan is easy to understand, and budget-friendly. It provides everything you'll need to maintain a secure and reliable network with happy productive users. Features of our services are:

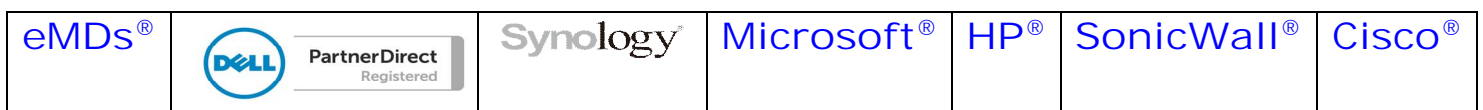

- 24/7 monitoring, security, and network administration
- Unlimited help desk support with 2-hour response time guarantee
- Unlimited onsite service with 2-4 hour response time within 40 miles radius guarantee
- Data backup management (onsite and offsite)
- Proactive IT consulting and planning meetings
- Software training classes to maximize staff productivity
- Anti-virus, anti-spam, and anti-malware protection
- Ability for users to remote control their pc (work from home)

## Who We Are

Established in 1989 in Parsippany, New Jersey; offers full-service IT management to the organizations with 1-100 computer users. Target markets include local municipalities, schools, professional services, construction and engineering companies, medical offices, government contractors, and manufacturers. Clients appreciate working with us because of our results-oriented, partner-like approach.

All Advanced Micro technicians undergo specialized training and skills testing throughout the year to keep current with IT advancements and certifications.
